

To Re-Size a Group of Photos in Irfanview (download Irfanview at www.irfanview.com)

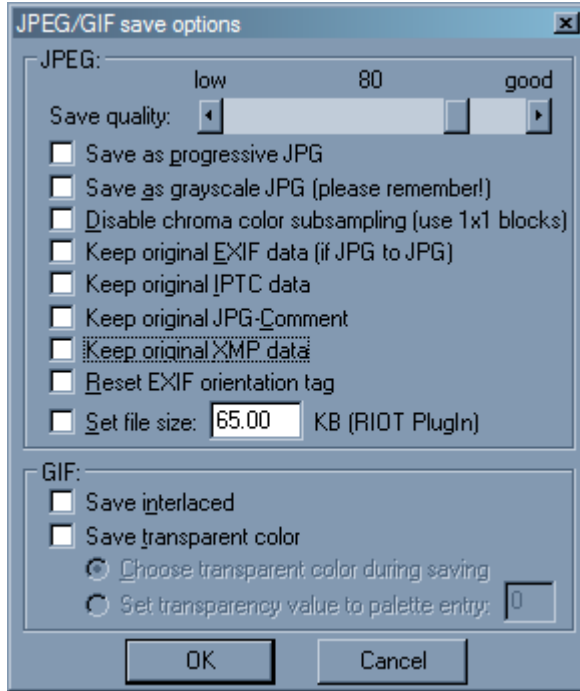

- 1) Open Irfanview:

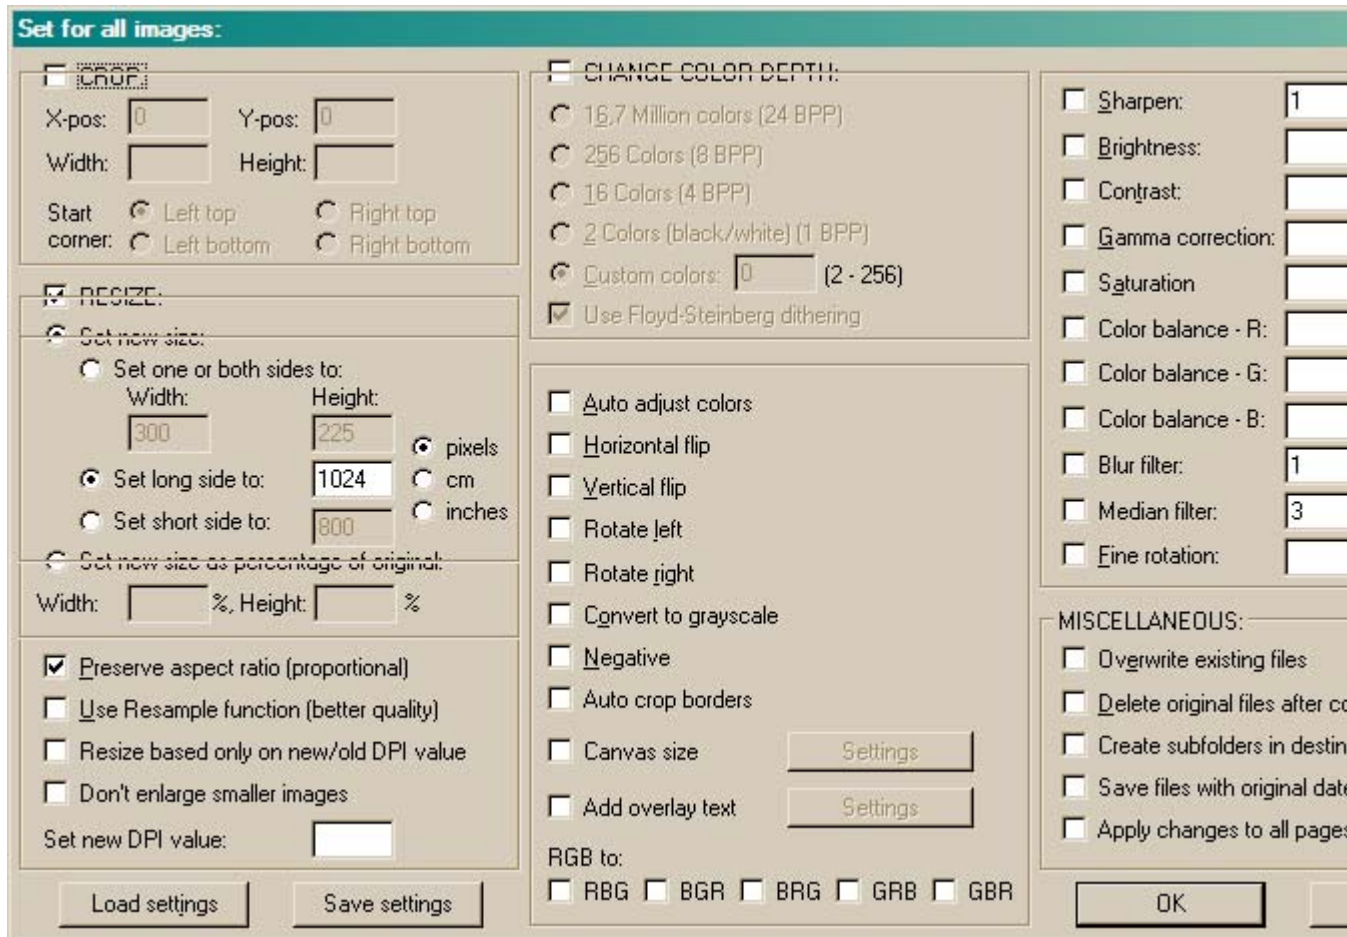

- 2) Go to File → Batch Conversion/Rename. Your **Work As:** and **Output format:** should be as below. Set your **Output directory for result files:** to a work folder on your computer:

3) Under the Batch conversion settings make sure the **Options** button has these values:

- 4) Also, Under the Batch conversion settings make sure the **Advanced** button has these values:

- 5) In the **Batch rename settings** → **Name pattern**, choose the desired file names. The ###'s will number file names.
- 6) Now select the photos to be resized and renamed, select the photos in the **Look In:**. Hi-light the desired photos and click the **Add** button to be converted.
- 7) Now select the folder where the new files will be saved, in the **Output directory for result files:**
- 8) Click the **Start Batch** to convert and rename the images.
